Research & Development Publications Catalogue

Author(s):	Compiled by R. Lockhart
Number:	PUB-90-01
Date of Publication:	January 1990
Published by:	Research and Development Branch, MTO
Ministry Contact:	Rob Lockhart, Technical Publications, Research and Development (416) 235-4704
Abstract:	<p>This catalogue lists reports published by the Research and Development Branch up to January 1990.</p> <p>Research Reports, Internal Reports, and Special Reports, being of particular interest, are presented first. These three series are listed in reverse chronological order at the beginning of the catalogue, for quick reference.</p> <p>The remainder of the reports are listed alphabetically by order number. Each order number code is an abbreviation or an acronym of a certain area of interest; for example, PAV stands for "Pavement", and SRR stands for "Structural Research Report". These abbreviations are defined in the Table of Contents.</p> <p>The catalogue also contains an alphabetical listing by title, with the corresponding order code number.</p>
Comments:	This catalogue is also available in electronic form, with key word search and abstracts. Please contact Rob Lockhart for details.
Key Words:	research report, internal report, special report
Distribution:	On request.

Research & Development Branch

Director

Peter Smith 235-4707

Highway Innovations & Strategic Research Office

Graham Jones 235-4679

Highway Innovations & Strategic Research (HISR) identifies, evaluates, demonstrates and monitors new products. It is concerned with relations with the external R&D community, and co-ordinates strategic research with Ontario, Canada, and the U.S. *HISR* acts as the Secretariat for the Highway Engineering R&D Steering Committee and the New Products Committee, and is also responsible for the R&D data bank, marketing R&D findings (reports, audio/visual), engineering value systems, human and social factors, and the Branch's computer services.

Materials Office

David Manning 235-4688

The *Materials* division deals with the properties, applications and quality assurance of concrete, steel, asphalt cements, elastomers, polymers, soils, mineral aggregates, de-icers, coatings, and corrosion. Other areas include structure surveys and rehabilitation technology, snow and ice control, and right-of-way maintenance and environmental impacts.

Pavements & Roadway Office

Gerhard Kennepohl 235-4701

Pavements & Roadway is responsible for the structural design, evaluation and performance of pavement. These responsibilities include maintenance practices, pavement management and cost, vehicle load effects and weighing, and roadway, vehicle and safety interactions (noise, lighting, geometrics, friction, guidrails).

Structures Office

Baidar Bakht 235-4674

Structures deals with bridge testing, and is responsible for development of the Bridge Code. These responsibilities include structural strength evaluation and analysis, timber structures, soil-steel structures, and heavy vehicle load control.

Traffic & Decision Systems Office

Rye Case 235-4676

Traffic and Decision Systems' responsibilities are traffic management, information and decision systems (mobility, road condition, vehicle and user), traffic simulation and analysis, and electronic and control technology.

Other Information Sources Available from R&D

Pavement Manuals — revised and expanded

The comprehensive series issued by R&D to standardize the ways in which pavement “distress” is identified and treated has been extensively revised. New manuals now available:

SP-001 *Pavement Maintenance Guidelines — Distresses, Maintenance Alternatives, Performance Standards (1989 edition).*

SP-021 *Manual for Condition Rating of Surface-Treated Pavements.*

SP-022 *Flexible Pavement Condition Rating — Guidelines for Municipalities*

SP-024 *Manual for Condition Rating of Flexible Pavements — Distress Manifestations* (replaces SP-004).

SP-025 *Manual for Condition Rating of Gravel Surface Roads*

To order these free publications, contact The Editor, R&D.

R&D Reports — R&D's quarterly newsletter

Quarterly newsletters on the latest in transportation research, including:

- Reports discussing ongoing research
- Articles on major conferences
- Updates on the latest developments in the R&D Branch
- Listings of technical reports for further reading on the topics covered in each newsletter

To be put on the mailing list for this free newsletter, contact The Editor, R&D.

TIES — Technology Information Exchange Service

TIES is a dial-up database developed by R&D. It provides access, by keyword searches, to MTO information such as report abstracts from the R&D Branch, Transportation Technology & Energy Branch, and Engineering Materials Office; the Designated Sources list for Materials (over 200 pages of MTO construction-related applications), and the Contract Bulletin (MTO contract information).

TIES users include manufacturers, suppliers, contractors, consultants, and municipalities. If you need up to date Ministry information and would like to subscribe to *TIES*, contact Jack Wear at (416) 235-4699.

Publications Available from Other Offices

Transportation Technology & Energy Branch

Transportation Technology & Energy Branch conducts and promotes the development, demonstration and application of transportation technologies to improve the effectiveness of Ontario's transportation systems. The reports available cover areas such as natural gas conversion systems and vehicle durability studies. To receive abstracts and order information, contact:

Engineering Materials Office

Through Bituminous, Concrete, Chemicals, Foundation Design, and Soil and Aggregates Sections, *The Engineering Materials Office* provides quality standards, policies and guidelines for materials and analysis services in the construction, maintenance, and operation of highways. Over 240 reports are available, covering areas such as laboratory testing and evaluation of materials used in highways and bridges. To receive order information, contact:

1974/75 North-South Ontario Highway Travel Season Variation Analysis	<i>TDF-82-01</i>
A Communications Study of the Exhibit of the Department of Transportation & Communications	<i>TC-71-01</i>
A Comparative Field Study of Calcium Magnesium Acetate and Rock Salt -- During the Winters of 1986-87 and 1987-88	<i>MAT-88-06</i>
A Comparative Field Study of Calcium Magnesium Acetate and Rock Salt (During the Winter of 1986-1987)	<i>ME-87-16</i>
A Comparison of Performance and Analysis of the Undrained Foundation Behaviour of Two Embankments	<i>RR-173</i>
A Computer Program to Determine the Collapse Load of Steel Trusses	<i>RR-218</i>
A Computer Program to Determine the Collapse Load of Steel Trusses	<i>SRR-77-01</i>
A Critical Assessment of Methods of Measuring the Rate of Corrosion of Steel in Reinforced Concrete	<i>ME-86-04</i>
A Cyclic Creep Study of Pavement Materials	<i>RR-163</i>
A Decade of Bridge Deck Cathodic Protection in Ontario	<i>ME-87-23</i>
A Design Framework for Highway Pavements	<i>RR-127</i>
A Development Program for Wood Highway Bridges	<i>SRR-79-07</i>
A Field Investigation of Aggregate Drying	<i>RR-042</i>
A Field Study of the Performance of Bridge Deck Waterproofing Systems in Ontario	<i>ME-75-01</i>
A General Method for the Analysis of Slab-on Girder Bridge Decks	<i>SRR-84-09</i>
A Guide to Consultant Research Assignments and the Ontario Joint Transportation Research Programme	<i>OJTRP-87-01</i>
A Laboratory and Field Evaluation of Air-Blown, Low Viscosity, Waxy Asphalts from Western Canadian Crudes	<i>MSP-80-11</i>
A Laboratory Evaluation of Ontario Air Cooled Slags as Concrete Aggregates	<i>RR-021</i>
A Laboratory Study of Annoyance Due to Traffic Noise and the Choice of Noise Descriptors	<i>AC-77-01</i>
A Manual of Futures Forecasting Methods	<i>TOO-81-01</i>
A Measure of Pavement Unserviceability	<i>RR-105</i>
A Method of Inspecting Dwellings to Evaluate Damage Caused by Highway Construction Activity	<i>IR-40</i>
A Model of the Employment, Trade and Tax Ramifications of the Provincial Highways Spending Program (MIES 3)	<i>ECN-82-01</i>
A Modern Approach to Three-Dimensional Alignment Design for New Highways	<i>IR-08</i>
A Performance Prediction Subsystem -- Flexible Pavements	<i>RR-200</i>
A Proposed Method of Regulating Vehicle Weights in Ontario	<i>RR-166</i>

A Prototype Prestressed Wood Bridge	<i>SRR-83-07</i>
A Rational Approach to Corrosion Protection of the Concrete Components of Highway Bridges	<i>ME-86-06 a</i>
A Report Concerning the Effects of Urban Freeway Noise on Residents Living Adjacent to Freeways	<i>NB-72-01</i>
A Review of Literature Regarding Concerns of Intercity Passenger Transportation and Goods Movement	<i>GM-83-01</i>
A Review of Swamp or Muskeg Literature with Methods for Treatment and Recommendations	<i>RR-003</i>
A Road Rideability Rating Experiment	<i>IR-19</i>
A Statistical Evaluation of Sampling Methods and Bituminous Concrete Compaction	<i>SP-80-02</i>
A Strategy for the Rehabilitation of Concrete Bridge Decks	<i>ME-79-02</i>
A Structural Wood System for Highway Bridges	<i>SRR-80-05</i>
A Study of Air Contaminant Damage to Fruit-Bearing Trees	<i>IR-14</i>
A Study of Partially Restrained Two-Way Bridge Slabs Subjected to Concentrated Loads	<i>RR-178</i>
A Study of Rural Roadside-Interview Sampling Techniques	<i>RR-142</i>
A Study of Stripping in Asphalt Pavements	<i>RR-177</i>
A Study of the Consolidation Characteristics of Sensitive Clay Subject to a Constant Stress Ratio	<i>RR-130</i>
A Study of Transverse Cracking of Bituminous Pavements	<i>RR-176</i>
A Synopsis -- The Truck Inspection Study	<i>TRE-82-01</i>
A System for the Strength Evaluation of Concrete Bridges	<i>IR-25</i>
A Systematic Approach to the Management of Highway Maintenance	<i>IR-15</i>
A Systems Model for Recreational Travel in Ontario: A Progress Report	<i>RR-126</i>
A Systems Model for Recreational Travel in Ontario: Further Results	<i>RR-148</i>
A Theory of Recreational Highway Traffic	<i>RR-128</i>
A Three-Dimensional Approach to Highway Alignment Design	<i>RR-138</i>
A Use Classification of Parks by Analysis of Extremes -- Final Report of a Recreational Travel Study	<i>RR-134</i>
Accelerated Strength Testing	<i>IR-18</i>
Accelerated Corrosion in Weathering Steel Bridges	<i>ME-84-03</i>
Accelerated Corrosion in Weathering Steel Bridges - An Update	<i>ME-84-04</i>
Accelerated Strength Testing of Concrete Cylinders	<i>RR-035</i>
Accelerated Strength Testing of Concrete Cylinders in Ontario	<i>RR-035A</i>

Accelerated Strength Testing of Concrete: The Sky's the Limit	RR-204
Acoustical Performance of Noise Barriers: Highway 401, Between Keele and Dufferin Streets	AE-82-06
Acoustical Performance of Noise Barriers -- Highway 407, North Side Pinecrest Avenue to Richmond Road in the Cities of Ottawa and Nepean	HOS-84-02
Acoustical Performances of Noise Barriers: Highway 417, North and South Sides, West of Woodroffe Avenue, Ottawa	AE-82-02
